eu.bac, Rules of Contribution, Annex

List of products, systems and services for comfort and energy efficiency in residential and non-residential buildings

- according to figure 2 a) b) c) of the Rules of Contribution

- Devices for management functions, e. g. monitoring & operator units/stations, programming units, data interface units, data processing devices/server stations, computing devices and management network.
- Devices for automation/control functions, e. g. monitoring & operator units, communication interfaces, controllers, application specific controllers, automation stations, computing devices, automation network.
- Room automation/control systems, home automation systems
- Field devices, e. g. room operator units, electronic individual zone/room controls, controllers, actuators/valves, sensors, electronic and other thermostats for all applications (e.g. HVAC, blinds, light, fire, security).
- Control components, e.g. thermostatic radiator valves, electronic radiator valves, electric and electronic zone controls, electro-mechanical and electronic thermostats, with and without timers, timers, weather compensators , optimum start/stop controls and any other controls component commonly found in either residential or non-residential heating, ventilating or air-conditioning system
- Hydronic automatic balancing valves
- Interconnection of devices
- Software
- Engineering services
- Installation, integration of products/systems
- Repairs/maintenance of building automation and control products/systems
- Upgrades and extensions
- Energy Services e.g. Energy Performance Contracting (EPC)
