## **eu.bac System Auditor Training Course in UK**

**6th/7th February 2014**

The eu.bac System Auditor scheme for assessing BACS and energy efficiency rating based in the EN15232 standard is being introduced to the UK. To attain the Systems Auditor status requires a training course followed by a first assessment.

The first eu.bac System Auditor training course is being held on 6th/7th February 2014 in London.

**We have 10 places available on this first course. Booking is required.**

### **Cost for in class training:**

BCIA and eu.bac members: £340+VAT

Non-members £510 +VAT

Includes lunch

### **Annual System Auditor fees**

For eu.bac members the annual System Auditor fee\* is included in your company annual subscription.

For non-eu.bac members there is a €300 per annum auditor fee\* payable to eu.bac for System Auditors which includes

Official authorisation by eu.bac

Ability to do and offer audits

Access to newest checklist and technical recommendations

\*Note to attain eu.bac System Auditor status it is a requirement to attend the classroom training and pass a test followed by doing the 1<sup>st</sup> inspection within 6 months of attending the training. Audits are

registered on the eu.bac database which is assessed by eu.bac within 12 months of attending the course, ongoing a minimum of 1 audit per year to maintain your auditor status.

### **Important Notes**

Delegates should be experienced Consultants or Engineers in Building Automation Control Systems with a detail understanding of Controls and their application on HVAC equipment or those who are also able to help promote the eu.bac System to their clients and the wider market.

Delegates must bring a PC laptop suitable screen size with Microsoft Excel to 2003 or greater to the training course, tablets are not suitable. This is a workshop class which includes following a trainer led exercise and populating the excel system audit tool during the classroom.

#### **Course venue:**

**Schneider Electric Offices**

**3rd Floor**

**120 New Cavendish Street**

**London W1W 6XX**

### **About eu.bac system**

eu.bac System is part of eu.bac Certification. Two dedicated teams have been working on “energy efficiency via building automation” since April 2009. The methodology is based on EN15232 and is verified by the University of Dresden. There are currently 15 auditors that are available to inspect Building Automation and Controls Systems in new and existing buildings.
